Red

Softbox RF 30x90
Softbox RF 30x120
Softbox FF 30x90

Black

N/A

1. All rods are color marked on the top of the rod base.
2. When mounting the rods, make sure to match the rod color with the same color on the speeding.
3. Align the rods with the holes by slightly bending the rods as shown in picture (Picture 1), makes assembly and disassembly easy.
4. For easy assembly/disassembly put the softbox upside down on the floor. Use your elbow to put pressure as well as to bend the rod and use your hand to insert/remove the rod as shown in (Picture 2).
5. Attach the snap fastener on the inner diffuser to the elastic on the softbox fabric (Picture 3).
6. Starting from a corner, the front diffuser is attached to the lower edge of the softbox velcro.
7. Separate the two halves of the velcro with your fingers, while stretching front diffuser and softbox fabric simultaneously. When both are equally stretched, pinch them firmly together (Picture 4).

SOFTBOXES – recessed front and flatfront diffusor

100801	Softbox 30x90 cm/1x3' RF
100802	Softbox 30x120 cm/1x4' RF
